EDUCATION

Bachelor of Engineering — Computer Science (Minor in Data Science)

Goa, India

Birla Institute of Technology and Science Pilani, K. K. Birla Goa Campus CGPA 9.2/10.00

November 2020 — 2024

EXPERIENCE

Software Engineer

Hyderabad, India

Microsoft — Azure Cloud Migrate

July 2024 — Present

• **Primary Responsibility**: Working on Azure Cloud Migrate, focusing on Kubernetes, distributed systems, and system performance optimization

- Key Contributions:
 - * Designing and implementing scalable cloud solutions for migrating on-premises applications
 - * Collaborating with cross-functional teams to enhance migration workflows
 - * Optimizing Kubernetes deployments for improved resource utilization and performance
- o Technologies: Azure, Kubernetes, Distributed Systems, Cloud Architecture, Database Migration

Member of Technical Staff Intern

Bengaluru, India

 \blacksquare DevRev

January 2024 — June 2024

- Primary Responsibility: Optimized Global Notifications Microservice architecture handling 60,000+ daily notifications by implementing distributed rate limiting, event-based throttling, and clustering algorithms
- Key Contributions:
 - * Engineered fault-tolerant notification rate limiter reducing spam by 85% and improving email delivery efficiency
 - * Developed hierarchical clustering system with O(log n) retrieval time to reduce redundancy and organize updates more effectively
 - * Architected LLM-powered notification summarizer using OpenAI GPT-4 and LangChain with custom prompt engineering
 - * Enhanced reminders, tasks, and bookmarking features to improve overall user experience
 - * Took ownership of critical components while actively participating in system design discussions, debugging sessions, and performance optimization efforts
- o **Technologies**: Microservices, Distributed Systems, OpenAI API, LangChain, Vector Embeddings, Redis Rate Limiting, Performance Optimization, Event-Based Architecture

Software Engineer Intern

Hyderabad, India

Microsoft

May 2023 — July 2023

- **Primary Responsibility**: Designed and implemented Customer Side **Metrics for Monitoring Meters** and publishing them to Azure Monitor and Geneva Dashboard using OpenTelemetry
- Key Contributions:
 - * Actively contributed to design decisions for **Azure Business Continuity Center** (V1 product) with the Azure Core Compute Team
 - * Implemented metrics using OpenTelemetry and its Geneva Extension
 - * Developed comprehensive logging and monitoring solutions to enhance observability
 - * Created documentation and examples to facilitate adoption by other teams
- o **Technologies**: C#, NET Framework, OpenTelemetry, Azure Monitor, Geneva Dashboard, MSTest, Telemetry

Summer Intern

Mumbai, India

LTI-Larsen~ &~ Toubro~ Infotech

May 2022 — July 2022

- **Primary Responsibility**: Worked on **DataOps** for Fosfor Spectra software platform, building comprehensive test suites and facilitating data migration
- Key Contributions:
 - * Coordinated between developers and test engineers to build an exhaustive set of tests
 - * Actively participated in Test Design Meetings and Daily SyncUps
 - * Developed automation scripts to streamline data migration processes
 - * Created test cases covering edge scenarios to ensure platform reliability
- o Technologies: DevOps, Data Migration, Test Automation, Collaborative Development

SKILLS

• Languages: Java, Kotlin, Python, JavaScript, C#, C++, Dart, Go

• Frameworks: Flutter, Android Framework, .NET Framework, NodeJS, React, TensorFlow, PyTorch

• Cloud & DB: AWS, Azure, Google Cloud, Firebase, MongoDB, Redis, Appwrite

• Tools: Git, Android Studio, VSC, Datadog, NumPy, Pandas, Qiskit

• Soft Skills: Leadership, UI Design, Event Management, Team Collaboration
